

A little background on these top, commercial Red Angus heifers...

They are owned by Fred and Linda Dowd of the C – B Ranch, which is located 10 miles north of Buffalo, WY.

While no stranger to agriculture, Fred and Linda are relatively new to the commercial Red Angus cattle business. In 1998 they bought their first Red Angus cows from Beckton Stock Farm. To complement their new cowherd's outstanding quality, they AI'd all of them to Buffalo Creek Hobo 1961. They made a fine decision and were well on their way to building a herd of great cows.

Fred and Linda have continued the aggressive use of AI, and have used only top bulls such as Cherokee Canyon, Hobo and Romeo. These heifers are representative of the Dowd's dedication to quality and as you can imagine, they reluctantly agreed to sell them. ***They did not keep any replacement heifers from this group. Everything is being offered for sale.***

These are outstanding heifers that will make really good cows. The heifers that are bred naturally were cleaned up with a Cherokee son. We are excited to have them in our sale.

Look for Fred and Linda's registered Cherokee sired bulls in Buffalo Creek's 2005 Spring sale.
