

## • Buffalo Creek Bred Females •

For almost half a century, Buffalo Creek has been known for having one of the breed's top maternal, high Stayability programs. We were never known as a "growth" herd, nor did we want to be. Instead, we concentrated on Calving Ease, Fertility, Reproductive Traits, and Structural Soundness. Our cattle were run year round under range conditions, and many of our cows had not experienced a good grass year until 2008.

For various reasons, these females were not able to go into our December Dispersal, or the sale last February. They were bred and are being offered to you now. Those bred AI are all bred to BUF CRK The Right Kind U199, Ref.Sire LN-1, the \$50,000 bull from our 2010 sale. We think you will be hearing more about him. The three partners that bought him are all reporting that he sired their best calves in 2011.

After being AI'd at Rule's, all the females went to Galen's irrigated pastures east of Sheridan, and were exposed to X180, the Lot 2 bull. One of the most complete bulls in the sale, his numbers are: CED 13(3%) BW -1.2 (27%) WW 38 (28%) YW 67 (37%) Milk 16 (16%) Mat 35 (40%) ME -3 (4%) HPG 12 (14%) CEM 4 (42%) Stay 13 (17%) Marb .06 (49%) REA .25 (16%) Fat 0 (44%). He is a son of Red Hills Julian 84S, Ref Sire J-2, a bull that is making his mark on the breed as one of its premier calving ease and big REA sires; 84S's REA EPD puts him in the top 3% of the breed. Last Feb, 84S was our high selling bull at \$30,000 when 25% interest sold to Ozark Hills & Calvo Family Red Angus.

In mid-September, the females returned to Rule's to get ready for the sale. They were Preg Tested by our vet, Dr. Mark Schreiber, using ultrasound on October 28.

Pasture Exposed to X180, Lot 3, 6/10 - 9/15. From the Carrie line, her MGGD is VC 1174, the famous dam to BC Hobo 1961. Another great prospect for Calving Ease, low Maintenance re-

quirements, and high Reproductive traits. Darryl & Susie Rhodes bought the dam, T206, in last February's sale; Lee Klein bought the MGD in our December Dispersal.
